LETTER OF RECOMMENDATION

Dear Admissions Committee,

It is my pleasure to write this letter of recommendation for **Mr. Hafiz Muhammad Saad**, who completed his research-focused internship under my supervision at Millat Tractors Limited, Engine Assembly Plant. During his internship, I observed his professional attitude, technical curiosity, and willingness to learn in a real industrial manufacturing environment.

Out of the numerous interns I have managed over the past 20 years, Saad stands out as one of the absolute best regarding research potential, dynamic problem-solving, technical competence in control systems.

What distinguishes Saad most is his research mindset and exceptional analytical abilities. During his internship, he worked on optimizing the valve-pressing process for the low-horsepower engine head assembly. His project focused on conceptualizing a PLC and HMI-based monitoring framework to systematically evaluate pressing force, engine head count, and real-time process traceability.

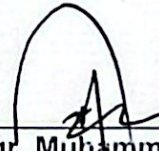

Rather than accepting processes at face value, Saad consistently tried to understand the reasoning behind manufacturing and testing decisions. He also engaged plant engineers with a problem-solving approach. His analytical ability, attention to detail, and eagerness to build his technical understanding distinguished him among the interns I have supervised.

In addition to his technical aptitude, he displayed strong professional qualities throughout his internship. He was punctual, disciplined, and respectful toward supervisors and fellow engineers, and maintained a positive attitude while working in a demanding industrial environment. He communicated well, worked cooperatively with others, and accepted feedback with maturity.

Based on my observations, I believe Saad possesses strong analytical ability, a solid technical foundation, and the work ethic to do well in further academic and research-oriented opportunities, including research internships and higher education programs abroad.

I recommend Hafiz Muhammad Saad for any research internships, higher education opportunities, and other academic or professional programs. I am confident that he will represent any institution or organization he joins with integrity, professionalism, and dedication.

Sincerely,

12-Aug-26
Engr. Muhammad Arfan
